DEVELOPMENT HISTORY

Pizza is the world's most famous Italy cuisine, the food was first appeared in Naples, and the first pizza inside only tomatoes, then gradually added to the growing number of other ingredients, it is very old form of cooking.

2015, COOKERYAKI developed the lava pizza oven. This action immediately stirred the whole pizza market, "the oven baked is more delicious!" This saying goes throughout every corner of the country.

August 2015, the first appearance of the pizza oven in Chengdu exhibition, directly attracted the international pizza master's attention!

No smoke

Cookeryaki has developed a unique design of large tray in the baking process of fish, avoiding oil and water dripping on the charcoal which produces smoke.

7 minutes, 14 fish

Set the heat on 300 ~380 degrees, and it only takes 6-8 minutes to get 14 golden-brown and juicy fish ready. Enjoy the crispy skin and soft inside with Cookeryaki fish oven.

Offer a customer-involved cooking journey

Charcoal fish Grill Oven not only can be in the kitchen but also can be moved to the hall of the restaurant. This design is specially made so that the restaurant is different from other place..Guests not only can see the process of preparation, but also can have a wonderful experience about the food.
